*List of technical cooperation activities***APPENDIX L****LIST OF TECHNICAL COOPERATION ACTIVITIES****Introduction**

The purpose of the list of UNIDO technical cooperation activities is to provide representatives of Member States with a convenient overview and reference not only for use during discussions at the sessions of the policymaking organs, but also for consultations with the Secretariat throughout the year.

The information is presented by country as in the 2015 report, including adjustments and simplification to the report following the introduction of the enterprise resource planning (ERP) system and related management decisions.

The current report shows individual projects by country so as to make it consistent with the technical cooperation dashboards accessible to Member States. The project identification (ID) is numerical, following the established scheme in the ERP system.

In the financial information part, the report presents three sets of values: (1) “Total budget” includes all resources made available to the project; (2) “Current year expenditure” presents all expenditures (disbursements and commitments) incurred during the reporting period; and (3) “Previous year expenditure” contains all expenditures incurred prior to the reporting period. The financial data is presented in US dollars as at 31 December 2016.

The representation of financial data follows UNIDO’s reporting standards. For example, a negative value might be shown in some instances as current year expenditure, a phenomenon that resulted from the splitting of expenditures by reporting periods. A negative current year expenditure figure would, therefore, indicate the downward adjustment of a previously reported commitment in the current reporting period.

Approval date of the project (project allotment document (PAD) issuance date) is also provided, as in previous years, indicating the month and year when the funds were made available to the project.

Titles of the projects are listed in their original language, as approved by the concerned Government and UNIDO, under the recipient country/area/territory.

The appendix also includes listings of regional, global and interregional projects. Concerning umbrella projects, for example those where donor financing covers various projects, only the individual projects are listed.

This appendix will be subject to further adjustments as warranted with the aim of making it available through the ERP system/Open Data Platform, and of further enriching its content to include reporting on results achieved on a country portfolio level.
